# **WORKBOOK.** MEN'S SAFETY SHOES.

puma-safety.com

SAFETY

designed for protecting from open eletrical circuits up to 18.000 volts under dry conditions. They meet or exceed ASTM F2413-18 and ASTM F2412-18a\*

STATIC DISSIPATIVE These shoes reduce the accumulation of static electricity by conducting the body charge to the properly grounded flooring system. They meet SD Static Dissipative ASTM F2413-18 and ASTM F2412-18a requirements.

**SLIP RESISTANT** The outsole is slip resistant, which means that the wearer will not skid when he walks

At least for a short contact these outsoles are heat resistant up to 572°F. That 's pretty hot.

BREATHABLE Breathable materials protect against overheating by balancing the foot temperature during work. Your feet will feel fresh and less tired. water out but not in.

WATERPROOF It will keep your feet dry but without this rubber boot feeling due to the clever moisture management that lets

WATER RESISTANT These styles are constructed for keeping the foot dry from outside while it is breathactive from inside. So they are well dry during the work.

METAL FREE Sometimes you need a shoe without any metallic parts, thus allowing you to pass through metal detectors.

COMFORTABLE FIT Extra comfort due to more freedom of toes

**BIG SIZES** For all working big foots: these models are available up to size 14.

MULTIPLE WIDTHS For shoes that have multiple width ontions

LIGHTWEIGHT Special materials and their processing make the shoe particularly lightweight. The result is an even higher wearing comfort.

IQ.CELL The gel pad built into the heel area was developed to provide essential shock absorption plus energy return.

### SAFETY TOE MODELS: ASTM F2413-18 and ASTM F2412-18a

All PUMA SAFETY safety shoes meet or exceed the highest ASTM standards for toe impact I/75 and compression C/75 protection.

#### SOFT TOE MODELS: ASTM F2892-18, ASTM F3455-21, ASTM 2413-24, ASTM F2892-24

#### ASTM F2913-19 and F3445-21

All PUMA SAFETY shoes meet ASTM F2913-19 non-slip testing standards and ASTM F3445-21.

#### **PUMA SAFETY & THE ENVIRONMENT**

All PUMA SAFETY products are developed and manufactured by ISM, a company based in Germany since 1930. ISM, now part of the PIP® global family, is a leading European provider in the safety and protective gear business.

As a PUMA SE license partner since 2002, ISM's production sites are regularly audited under the principles of PUMA S.A.F.E. to ensure that fair working conditions are kept in all factories.

ISM acknowledges its responsibility not only towards its customers and business partners but also towards the environment.

Therefore ISM follows the principle of sustainable development. We are proud to say that all our products are PVC free. ISM is aware that continuous improvements are required to live up to our environmental accountability and is working ard to reduce its CO<sup>2</sup> footprint.

#### PUMA S.A.F.E.

Under the banner of PUMA S.A.F.E. (Social Accountability and Fundamental Environmental Standards), PUMA is encompassing issues of human rights, product safety and ecological concerns and combining them with new initiatives that will drive the company to cleaner, greener, safer and more sustainable systems and practices. In addition, transparent and constructive dialogues with stakeholders, supply partners, and non-governmental organizations (NGOs) such as the Fair Labor Association have ensured that the PUMA Code of Ethics and Code of Conduct are observed and audited in workplaces worldwide.

# HERITAGE. CLASSIC GOES SAFETY.

Inspired by PUMA classics that have been popular for decades, the HERITAGE work shoe collection from PUMA Safety combines innovative technologies such as the idCELL element integrated in the sole, the slip-resistant rubber outsole with special herringbone pattern and the evercushion RELIEF footbed - for outstanding wearing comfort with reliable safety at work.

### RUBBER SOLE HERITAGE

The 572°F heat-resistant rubber outsole has an excellently slip resistant herringbone pattern with optimum grip. The softer rubber midsole grants underfoot cushioning and shock absorption. By increasing the rotation point, friction and thus fatigue are greatly reduced. The wide frame ensures all around perfect stabilization.

#### idCELL

The large idCELL elements in the heel and forefoot area consist of a very soft, shock absorbing material. They perfectly absorb impacts and shocks e.g. when the heel strikes the ground.

### **ROTATION POINT**

The special feature of the sole is the integrated rotation point. This point in the area of the inner metatarsus is the most severely strained part while walking. By reinforcing the rotation point, friction and thus fatigue is greatly reduced.

EVERCUSHION<sup>®</sup> RELIEF

Maximum performance for your work shoes. The contoured evercushion<sup>®</sup> RELIEF footbed follows the shape of the foot and ensures pressure relief. A specially coordinated arch support enables the foot to be positioned naturally in the shoe and stimulates the muscles when walking. A layer of a particularly soft and stable foam provides extra cushioning and thus superior shock absorption. Grooves on the underside of the insole ensure that the sole does not slip in the shoe. Comfort and support to get your job done.

**Protection** composite fiberglass toe cap **Lining** BreathActive functional lining Footbed evercushion®RELIEF

**Outsole** 572°F heat-resistant rubber outsole with excellently slip resistant herringbone pattern and idCELL elements

# **URBAN EFFECT. EFFORTLESS WORK.**

Urban street style as a performance safety shoe. The new URBAN EFFECT styles are all about legendary classics and cult sneakers, but include the latest technologies from the fields of sports and safety footwear, such as the new sole construction with EFFECT.FOAM, which ensures optimal cushioning and energy return (70% above the standard). URBAN EFFECT gives everyday work an extra dose of dynamism

### RUBBER OUTSOLE

The 572°F heat-resistant rubber sole has a special sole profile that drains off liquids and thus optimizes the grip. By increasing the point of rotation, friction and thus fatigue are greatly reduced.

### EXTERNAL TPU HEEL COUNTER

This element offers protection and helps mantain a correct ergonomic walking posture by providing additional support.

#### EFFECT.FOAM®

#### Tireless comfortable!

- 60% energy return
- 47% less impact on bones and joints\*

EFFECTFOAM

- extremely powerful and light
- permanently high level of comfort for fatigue-free work
- \* Dynamic energy absorption reduces the impacts to 1.6KN, the average for safety shoes is 3.0KN.

#### EVERCUSHION<sup>®</sup> BA+

Maximum performance for your work shoes. The contoured evercushion<sup>®</sup> BA+ footbed follows the shape of the foot and ensures a natural position, pressure relief and muscle stimulation. It is made of two layers of breathable foamed polyurethane in different densities with extra cushioning material in the critical heel and ball area for superior shock absorption. An odor-resistant, sweat-wicking and non-slippery fabric covers the whole footbed. Excellent comfort and support to get your job done.

#### **ROTATION POINT**

The special feature of the sole is the integrated rotation point. This point in the area of the inner metatarsus is the most severely strained part while walking. By reinforcing the rotation point, friction and thus fatigue is greatly reduced.

UP TO 60%

high performance.

# **URBAN PROTECT. INSPIRED BY RETRO DESIGN.**

inspired by retro design - Due to the world cup in the sixties, the successful PUMA KING model got a high level of fame. Its design is still up-to-date, so with URBAN PROTECT we created a line that repeats this successful story. Classical design elements combined with modern fashionable cut. The fiberglass toe cap, the sole construction and the custom-fit last offer technical standards.

#### RUBBER OUTSOLE

This hard-wearing 572°F heat- and oil-resistant rubber outsole has a distinctive tread design with channels to clear fluids — for optimum slip resistance. Due to the reinforcement of the rotation point, friction and thus signs of fatigue can be significantly reduced.

#### EVA MIDSOLE

Thousands of tiny bubbles in this ultra lightweight midsole ensure an optimal cushioning and improve the flexing action of the foot.

### idCELL

The idCELL element in the heel area consists of a very soft, shock absorbing material. It perfectly absorbs impacts and shocks when the heel strikes the ground.

### ROTATION POINT

The special feature of the sole is the integrated rotation point. This point in the area of the inner metatarsus is the most severely strained part while walking. By reinforcing the rotation point, friction and thus fatigue is greatly reduced.

#### COMFORT FOOTBED

The anatomically shaped footbed provides optimal cushioning with every step. The specially designed arch support enables the foot to be naturally positioned in the shoe and stimulates the muscles when walking.

# METRO PROTECT. STYLE MEETS SAFETY.

NEW SOLE

STYLE MEETS SAFETY - Should a safety shoe always look like a safety shoe? No, the METRO PROTECT line stands for stylish yet highly protective footwear with a clear lifestyle inspiration, which perfectly fits into our modern day working environment. Contrasting colours, the directly injected PUMA formstripe or the carbon effect of the sole define these modern styles.

## $\begin{pmatrix} 1 \end{pmatrix}$

### METRO SOLE

The unique full TPU outsole provides the performance features, you know from high performance soccer shoes, for the first time in safety footwear i.e. slim sole design, high durability, top grip and great flexibility. The twocoloured TPU sole comes with an idCell cushioning pad in the heel area. The drawn up scuff cap avoids abrasion of the leather in the toe area while working on your knees.

## 3

#### UPPER

We use high quality materials to combine superior comfort with best performance of the METRO PROTECT collection. It's the fusion of safety and lifestyle.

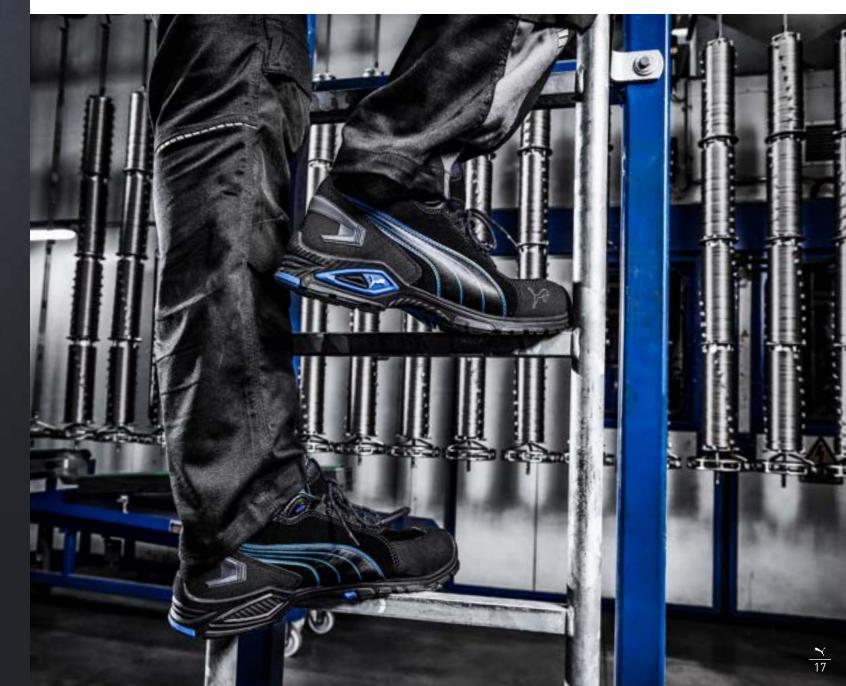

### 2

#### idCELL ELEMENT

The idCELL element in the heel area consists of a very soft, shock absorbing material. It perfectly absorbs impacts and shocks when the heel strikes the ground.

### EVERCUSHION® PRO

The structure of the evercushion<sup>®</sup> pro insole provides lightweight cushioning from the beginning until the end of the movement, thus relieving the pressure zones. Its durable fabric cover and the perforated area at the forefoot ensure both breathability and comfort.

# MOTION PWR. COMING SOON INFINITE POWER. MAXIMUM CONTROL.

The athletic MOTION PWR models combine unbeatable performance with a fantastic look. The PWR.FOAM® midsole, the latest development from top-level competitive running, ensures the fastest responses at a featherlight weight. Combined with the heat-resistant rubber outsole with its different tread zones for optimized traction, these shoes get you ready for even the stiffest challenges of your working day.

### MOTION PWR SOLE

The MOTION PWR sole is the centerpiece of our new athletic PUMA safety footwear line. The PWR.FOAM<sup>®</sup> midsole, our latest highquality performance foam technology, offers maximum responsiveness with a featherlight weight. The different tread zones of the up to 572°F heat resistant rubber outsole ensure optimum grip.

#### PWR.FOAM®

The latest innovation from high-performance running enhanced for the safety shoe sector. Through an additional progressive production process, our PWR.BEADS<sup>®</sup> are transformed into a super-light, permanently elastic midsole with an excellent and long-lasting energy return of up to 70% - for optimized wearing comfort during long working days.

#### EVERCUSHION<sup>®</sup> PRIME FOOTBED

Step into ultimate comfort with the evercushion<sup>®</sup> PRIME footbed, engineered from breathable open-cell polyurethane to keep your feet dry. It offers exceptional cushioning and shock absorption, while the memory foam molds perfectly to the contours of the foot for a personalized fit. Anatomically shaped for optimal support, the footbed features a textured section on the ball area that gently massages the foot with every step, enhancing circulation and reducing fatigue.

# **MOTION PROTECT.** NEXT LEVEL OF CUSHIONING.

INNOVATIVE IN EVERY DETAIL - The new definition of the sport-inspired performance safety shoe line MOTION PROTECT is the perfect symbiosis of cushioning, energy return and design. A new feature is the sole construction with the innovative IMPULSE.FOAM® midsole with anti-fatique technology for work without tiredness. Due to this new material, the wearer feels during walking the highly comfortable shock-absorption with simultaneous dynamic energy return and stability.

#### RUBBER OUTSOLE MOTION

The 572°F heat resistant HRO rubber sole is inspired by the latest running technology. The anti-slip sole profile with its diagonal grooves ensures perfect flexibility and secure contact to the ground (SRC). A nylon shank is integrated in the sole concept.

### FLEX GROOVES

The diagonal grooves in the sole profile provide a better flexibility and a smoother feel on the ground. Furthermore, they will give you a better grip while walking.

#### **TORSION CONTROL** ELEMENT

The TPU torsion control element in the middle of the sole supports the natural flexing action of the foot while walking and provides a better support and stability for the feet.

#### EVERCUSHION<sup>®</sup> BA

This anatomically designed footbed provides a high level of comfort and moisture control, giving a pleasant foot climate. This footbed, as used in high performance sports shoes, is made from a soft, open-cell, resilient foam that will not compress in wear, which ensures a high level of cushioning, breathability and moisture regulation.

**Protection** composite-fiberglass toe cap **Lining** BreathActive functional lining Footbed evercushion® BA **Shank** TPU torsion control element

#### IMPULSE FOAM MIDSOLE

The innovative IMPULSE.FOAM<sup>®</sup> midsole in two different densities reacts to each of your steps with an energy impulse. Thereby the IMPULSE.FOAM<sup>®</sup> does not only return up to 55% of the energy, but also provides maximum cushioning, excellent stability and long-lasting comfort.

# **REBOUND. NEW** SAFETY WITH A TRAMPOLINE EFFECT.

In order to reduce physical stress to the largest extent, the REBOUND line offers a optimized cushioning capacity and comfort. The heart of the REBOUND styles is the comfortable cushioning concept consisting of the fast reacting EFFECT. FOAM<sup>®</sup> midsole in combination with the evercushion<sup>®</sup> pro ESD footbed and the robust outsole.

#### REBOUND SOLE

The PU cushioning concept consisting of the EFFECT.FOAM<sup>®</sup> midsole, combined with the compact PU outsole and the evercushion pro<sup>®</sup> ESD footbed offers even more comfort and cushioning for a fatigue-free work experience. The side wall fins of the outsole work in harmony with the EFFECT.FOAM<sup>®</sup> to bring additional cushioning on the edges.

#### COMPACT PU OUTSOLE

The striking tread profile incorporates zoned areas to offer maximum support and grip on uneven but also flat slippery surfaces. The outer wide cleats also seek out traction on loose terrain and bring a self cleaning function. In addition, the special high density material supports durability and prolonged life of the shoes, whilst also being resistant to fuel oils to prevent adverse affects in the end environment.

#### EFFECTFOAM

#### EFFECT.FOAM®

Tirelessly comfortable!

- 60% energy return
- 47% less impact on bones and joints\*
- extremely light and effective
- permanently high comfort level for fatigue-free work
- \* Dynamic energy absorption reduces the impacts to 1.6KN, the average for safety

#### EVERCUSHION<sup>®</sup> RELIEF<sup>T</sup> FOOTBED

Maximum performance for your work shoes. The evercushion<sup>®</sup> RELIEF footbed consists of two different layers that fit together precisely. The upper layer is made from memory foam and adapts perfectly to the shape of the foot, offering cushioning just where it's most needed. The bottom layer is made of evercushion<sup>®</sup> foam and provides optimum pressure relief and durable cushioning. A specially adapted arch support keeps the foot in a natural position inside the shoe and stimulates the muscles while walking. The wavy grooves on the bottom stop the footbed from sliding inside the shoe. This is the comfort and support you need to get your job done.

# WOMEN'S SAFETY SHOES.

puma-safety.com

puma-safety.com

designed for protecting from open eletrical circuits up to 18.000 volts under dry conditions. They meet or exceed ASTM F2413-18 and ASTM F2412-18a\*.

BREATHABLE

Breathable materials protect against

overheating by balancing the foot

temperature during work. Your feet

will feel fresh and less tired.

STATIC DISSIPATIVE These shoes reduce the accumulation of static electricity by conducting the body charge to the properly grounded flooring system. They meet SD Static Dissipative ASTM F2413-18 and ASTM F2412-18a requirements.

SLIP RESISTANT The outsole is slip resistant, which means that the wearer will not skid when he walks.

At least for a short contact these outsoles are heat resistant up to 572°F. That 's pretty hot.

WATERPROOF It will keep your feet dry but without this rubber boot feeling due to the clever moisture management that lets water out but not in.

WATER RESISTANT These styles are constructed for keeping the foot dry from outside while it is breathactive from inside. So they are well dry during the work.

METAL FREE Sometimes you need a shoe without any metallic parts, thus allowing you to pass through metal detectors.

COMFORTABLE FIT Extra comfort due to more freedom of toes.

BIG SIZES For all working big foots: these models are available up to size 14.

MULTIPLE WIDTHS For shoes that have multiple width options.

LIGHTWEIGHT Special materials and their processing make the shoe particularly lightweight. The result is an even higher wearing comfort.

IQ.CELL The gel pad built into the heel area was developed to provide essential shock absorption plus energy return.

### SAFETY TOE MODELS: ASTM F2413-18 and ASTM F2412-18a

All PUMA SAFETY safety shoes meet or exceed the highest ASTM standards for toe impact I/75 and compression C/75 protection.

#### SOFT TOE MODELS: ASTM F2892-18, ASTM F3455-21, ASTM 2413-24, ASTM F2892-24

#### ASTM F2913-19 and F3445-21

All PUMA SAFETY shoes meet ASTM F2913-19 non-slip testing standards and ASTM F3445-21.

#### **PUMA SAFETY & THE ENVIRONMENT**

All PUMA SAFETY products are developed and manufactured by ISM, a company based in Germany since 1930. ISM, now part of the PIP® global family, is a leading European provider in the safety and protective gear business.

As a PUMA SE license partner since 2002, ISM's production sites are regularly audited under the principles of PUMA S.A.F.E. to ensure that fair working conditions are kept in all factories.

ISM acknowledges its responsibility not only towards its customers and business partners but also towards the environment.

Therefore ISM follows the principle of sustainable development. We are proud to say that all our products are PVC free. ISM is aware that continuous improvements are required to live up to our environmental accountability and is working ard to reduce its CO<sup>2</sup> footprint.

#### PUMA S.A.F.E.

Under the banner of PUMA S.A.F.E. (Social Accountability and Fundamental Environmental Standards), PUMA is encompassing issues of human rights, product safety and ecological concerns and combining them with new initiatives that will drive the company to cleaner, greener, safer and more sustainable systems and practices. In addition, transparent and constructive dialogues with stakeholders, supply partners, and non-governmental organizations (NGOs) such as the Fair Labor Association have ensured that the PUMA Code of Ethics and Code of Conduct are observed and audited in workplaces worldwide.

# HERITAGE. CLASSIC GOES SAFETY.

Inspired by PUMA classics that have been popular for decades, the HERITAGE work shoe collection from PUMA Safety combines innovative technologies such as the idCELL element integrated in the sole, the slip-resistant rubber outsole with special herringbone pattern and the evercushion RELIEF footbed - for outstanding wearing comfort with reliable safety at work.

### RUBBER SOLE HERITAGE

The 572°F heat-resistant rubber outsole has an excellently slip resistant herringbone pattern with optimum grip. The softer rubber midsole grants underfoot cushioning and shock absorption. By increasing the

rotation point, friction and thus fatigue are greatly reduced. The wide frame ensures all

#### idCELL

The large idCELL elements in the heel and forefoot area consist of a very soft, shock absorbing material. They perfectly absorb impacts and shocks e.g. when the heel strikes the ground.

### **ROTATION POINT**

The special feature of the sole is the integrated rotation point. This point in the area of the inner metatarsus is the most severely strained part while walking. By reinforcing the rotation point, friction and thus fatigue is greatly reduced.

EVERCUSHION<sup>®</sup> RELIEF

around perfect stabilization.

Maximum performance for your work shoes. The contoured evercushion<sup>®</sup> RELIEF footbed follows the shape of the foot and ensures pressure relief. A specially coordinated arch support enables the foot to be positioned naturally in the shoe and stimulates the muscles when walking. A layer of a particularly soft and stable foam provides extra cushioning and thus superior shock absorption. Grooves on the underside of the insole ensure that the sole does not slip in the shoe. Comfort and support to get your job done.

# **URBAN PROTECT. INSPIRED BY RETRO DESIGN.**

INSPIRED BY RETRO DESIGN - Due to the world cup in the sixties, the successful PUMA KING model got a high level of fame. Its design is still up-to-date, so with URBAN PROTECT we created a line that repeats this successful story. Classical design elements combined with modern fashionable cut. The fiberglass toe cap, the sole construction and the custom-fit last offer technical standards.

#### RUBBER OUTSOLE

This hard-wearing 572°F heat- and oil-resistant rubber outsole has a distinctive tread design with channels to clear fluids — for optimum slip resistance. Due to the reinforcement of the rotation point, friction and thus signs of fatigue can be significantly reduced.

### EVA MIDSOLE

Thousands of tiny bubbles in this ultra lightweight midsole ensure an optimal cushioning and improve the flexing action of the foot.

idCELL

The idCELL element in the heel area consists of a very soft, shock absorbing material. It perfectly absorbs impacts and shocks when the heel strikes the ground.

#### **ROTATION POINT**

The special feature of the sole is the integrated rotation point. This point in the area of the inner metatarsus is the most severely strained part while walking. By reinforcing the rotation point, friction and thus fatigue is greatly reduced.

#### COMFORT FOOTBED

The anatomically shaped footbed provides optimal cushioning with every step. The specially designed arch support enables the foot to be naturally positioned in the shoe and stimulates the muscles when walking.

# MISS SAFETY. **MOTION PROTECT 1.0.**

WHAT WOMEN WANT - Comfortable safety shoes that do not look like those. The styles of PUMA SAFETY made especially for women fulfill this need while satisfying our high demands in terms of safety and comfort.

#### RUBBER OUTSOLE

This 572°F heat, oil and slip resistant rubber sole, with TPU protection in the heel area, is inspired by the latest running technology. The sole profile with it's diagonal grooves ensures a perfect flexibility and a secure contact to the ground (SRC). (ASTM F 1677 Mark II)

The gel pad directly embedded in the heel area works just like a trampoline - it absorbs shock energy and returns it immediately as bounce.

#### **TORSION CONTROL** ELEMENT

The TPU torsion control element in the middle of the sole supports the natural flexing action of the foot while walking and provides a better support and stability for the feet.

SAFETY KNIT®

STEP IN COMFORT - The highly flexible fabric adapts perfectly to the foot and fits like a sock. The SAFETY KNIT<sup>®</sup> upper, a mixture of high quality synthetic fibres. offers high flexibility, resistance and breathability.

#### **EVA MIDSOLE**

Thousands of tiny bubbles in this ultra lightweight midsole ensure an optimal cushioning and improve the flexing action of the foot.

#### EVERCUSHION<sup>®</sup> MISS

This anatomically designed lightweight footbed with waffle structure will keep your feet cool and dry by transmitting moisture away from the foot. The open cells allow a rapid drying when the shoes have been taken off.
